

2011 Composite Transport Workshop

May 17 Open Industry Forum

Safety Awareness Composite Education Needs

Survey Questions

- Do you believe there are enough trained composite resources with knowledge of safety and certification critical tasks for composite transport applications (*in your company and the field*)?
- Should FAA continue Level II composite safety awareness training development?
- What is the best way to address Level III composite specialized training needs (please explain)?:
 - A. OJT
 - B. Specialized university or industry trade school courses
 - C. Industry standards organizations
 - D. Online technical literature
 - E. All of the above
